

Principles of the Prevention and Control of Infection in Health Care Settings

This course is ideal for anyone who is already working in or intending to work in the healthcare or social care sector. It will provide them with knowledge and understanding of the Prevention and Control of Infection to support their role.

Course Overview

This qualification will help learners to understand the meaning and importance of infection control, the methods used to prevent and control the spread of infection. The causes of infections, the conditions in which they thrive and the ways that they can be spread.

This qualification is suitable for both new and existing employees.

Course content

Each learner will be provided with high-quality and engaging support materials that provide the knowledge and understanding required to undertake the end of unit assessments. The course covers:

- Unit 1: Principles of the causes and spread of infection in health care settings
- Unit 2: Principles of the importance of personal hygiene and health in the prevention and control of infection in health care settings
- Unit 3: Principles of decontamination, cleaning and waste management in health care settings
- Unit 4: Principles of infection prevention and control in a health care setting
